INSURANCE BROKERS

Bot Meets Buyer

Website Chatbot for Client Engagement

Agenda

1. Meet the Team & Project Overview
2. Google Analytics & Consumer Psychology Research
3. Use Case Analysis & Platform Comparison
4. Prototype Development
5. Demo & Pilot Plan
6. Future Outlook

Meet the Team

Objective

"Develop a chatbot that can **engage** potential clients, **answer** basic Heffernan questions, and **guide** them through the initial stages of their journey."

Tasks

- Identify user needs and use cases
- Compare and select a platform
- Develop a prototype
- Develop pilot plan for launch

Project Timeline

Week 1:

Project Planning and Chatbot Research

Week 4:

Conversation Design and Platform Onboarding

Weeks 7-8:

Pilot Plan and Finalization

Weeks 2-3:

Use Case and Platform Research/Selection

Weeks 5-6:

Prototype Development and Testing

Meet Your Heffernan Guide

Ask Heffernan

Our friendly chatbot is here to help prospective Heffernan clients.

It makes exploring Heffernan's services easy and stress-free!

What can our chatbot do?

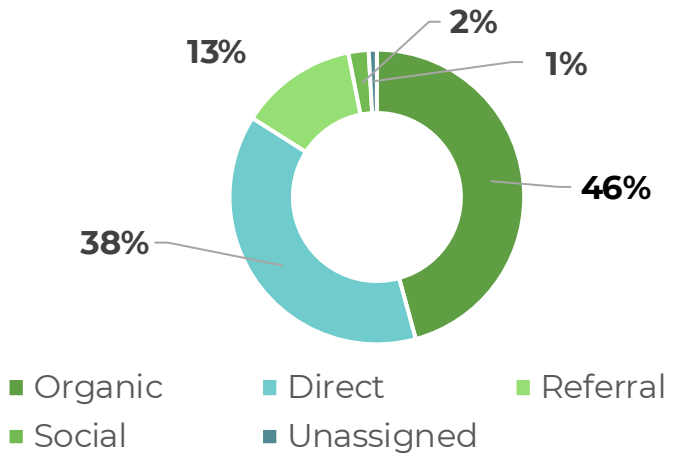
- Answer basic insurance questions
- Explain Heffernan’s services
- Help you understand confusing insurance terms
- Guide you to the right resources or team member

Google Analytics Findings

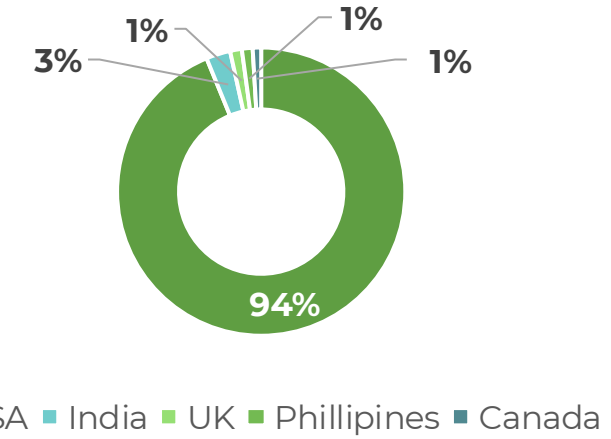
Key User & Traffic Insights

- **Retention (May 20-June 20)**
  - **6.3K** new users
  - **1.3K** returning users
- **Engagement Overview**
  - Average engagement rate per active user: **43 seconds**

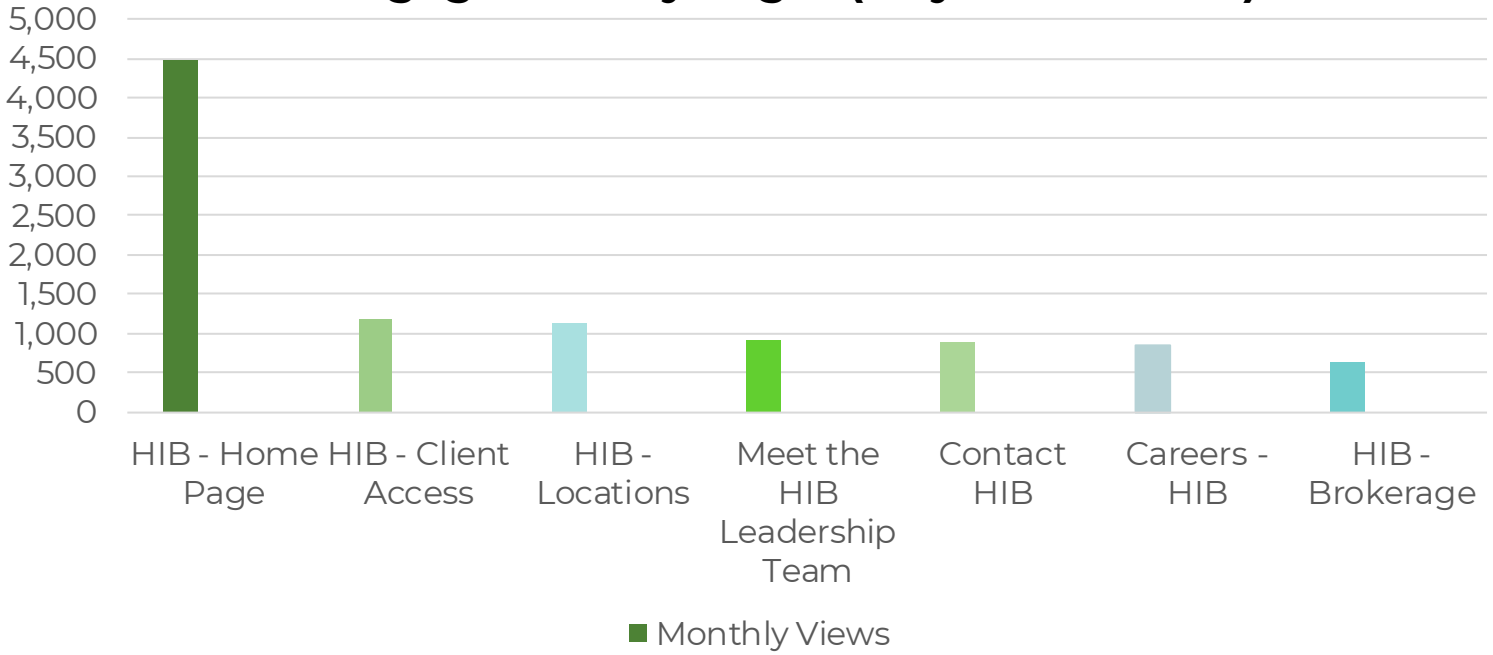
User Acquisition



Demographic Data



Engagement by Pages (May 20 – June 20)



Chatbot Implications

Prioritize U.S. Users

- Majority of users are English-speakers from U.S.

Focus On Efficiency

- Most users engage for < 1 minute
- Concise response flows

Personalization if Possible

- Tailor bot to individual needs

Simplicity

- Less complicated use cases
- Minimize confusion

Consumer Psychology

What User Expects	When Bots Fall Short	Exit Strategy	Design Takeaways
• Easy to use • Fast, clear answers • Trustworthy	• Not full solutions • Not friendly enough • Human preference	• Transition to live agent • Identify when question is out of scope	• User-friendly • Identifiable • Concise answers • Redirect out of scope questions

Insights from Finnish Insurance Chatbot "EMMA", Psychology of Consumer Behavior (Keiser University, 2025), & Chabot Acceptance Study (Journal of Organizational Computing and Electronic Commerce, 2024).

Chatbot Use Cases

What are different scenarios that potential clients may need a chatbot for?

Getting Started with Insurance

“I’ve never had insurance, where do I start?”

Insurance Terms Explained

"What's a deductible?"

What Heffernan Offers

“What kinds of insurance do you provide?"

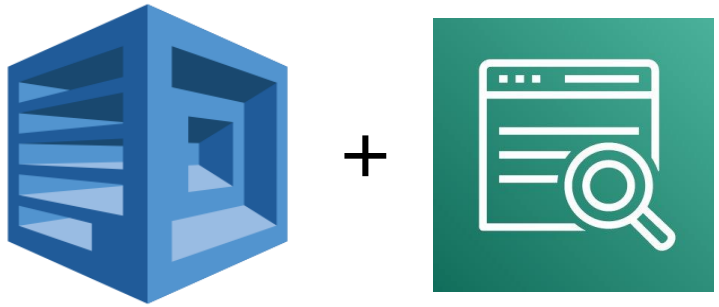
Availability & Support

“How do I get in touch with someone?”

Platform Comparison

Amazon Lex

Amazon Lex + Kendra



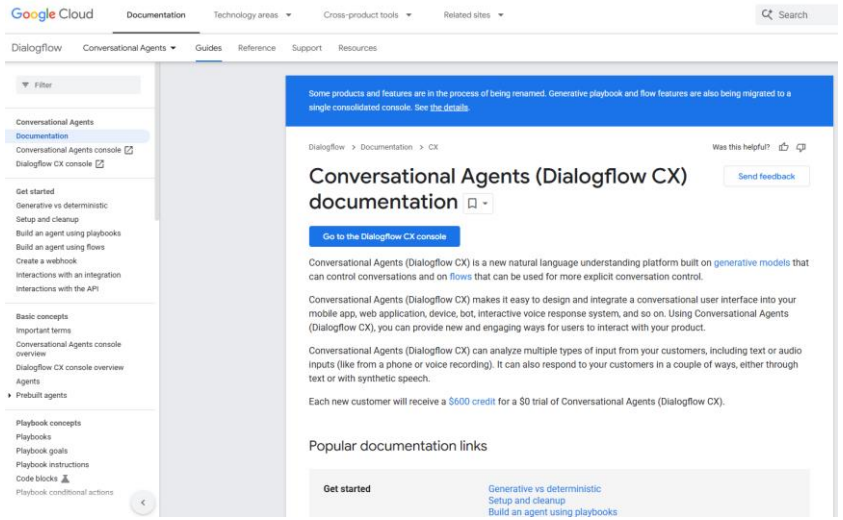
Microsoft Bot Framework

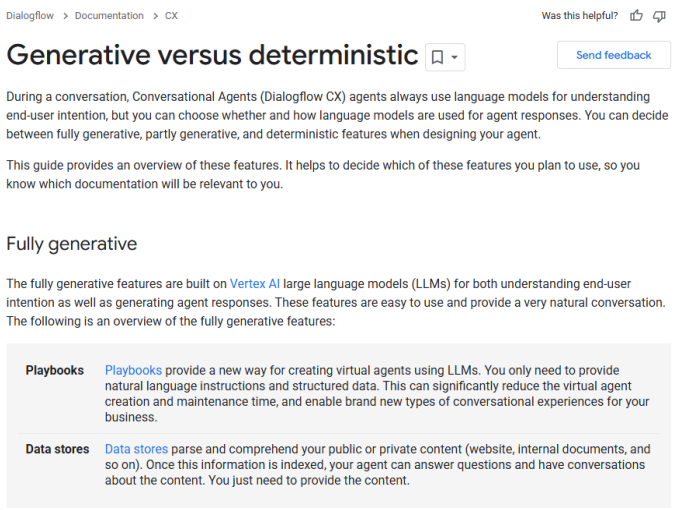
Google Dialogflow CX

Final Platform Decision

Criteria	Recommendation
Most cost efficient	Google Dialogflow CX
Easiest to implement and deploy	Google Dialogflow CX
Best for advanced search capabilities	Lex + Kendra
Most flexible	Microsoft Bot Framework
Best empathy/sentiment capabilities	Google Dialogflow CX
Overall	**Google Dialogflow CX**

Researching Dialogflow Documentation





Which features are most relevant to our use cases?

What is the setup process?

How do we give the bot information about Heffernan?

Implementation & Testing

Conversation Flows

- Hard to create conversation flows that address **every possible situation**
- Very static and specific

Solution

- Connected bot to Heffernan website as a data source
- Now able to answer **all** Heffernan-related questions

Testing

- Asking bot questions from use cases
- Troubleshooting based on questions it can't answer

WordPress Integration

Allows use of a Dialogflow CX bot in any WordPress Site

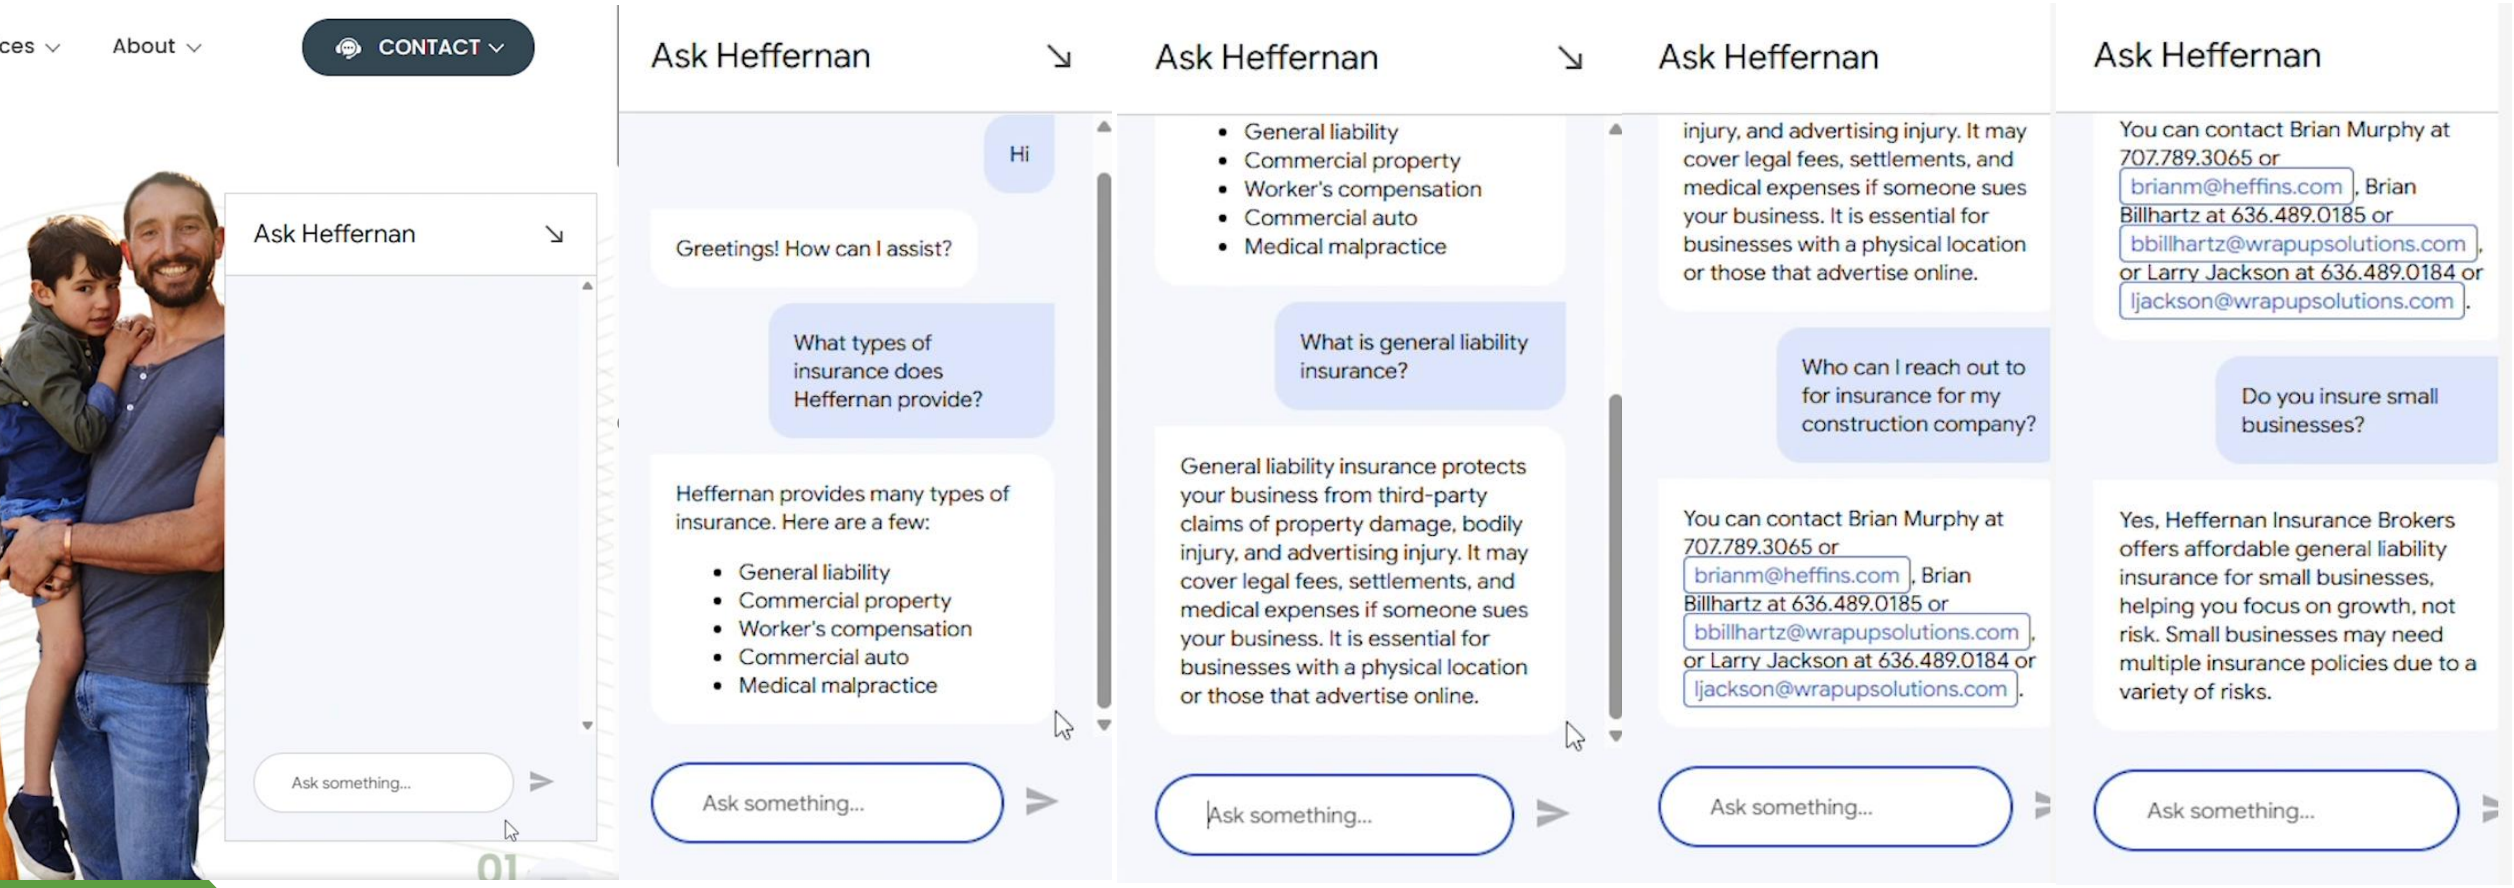
Chatbot In Action



Pilot Plan

Objective

Lay out 3-month plan to test integration and validate use cases

Success Metrics

- 70-90% accuracy
- 60-80% resolution rate
- 80% user satisfaction

Feedback and Next Steps

Gather feedback, prepare for full rollout

Testing

Functionality, accuracy, and speed

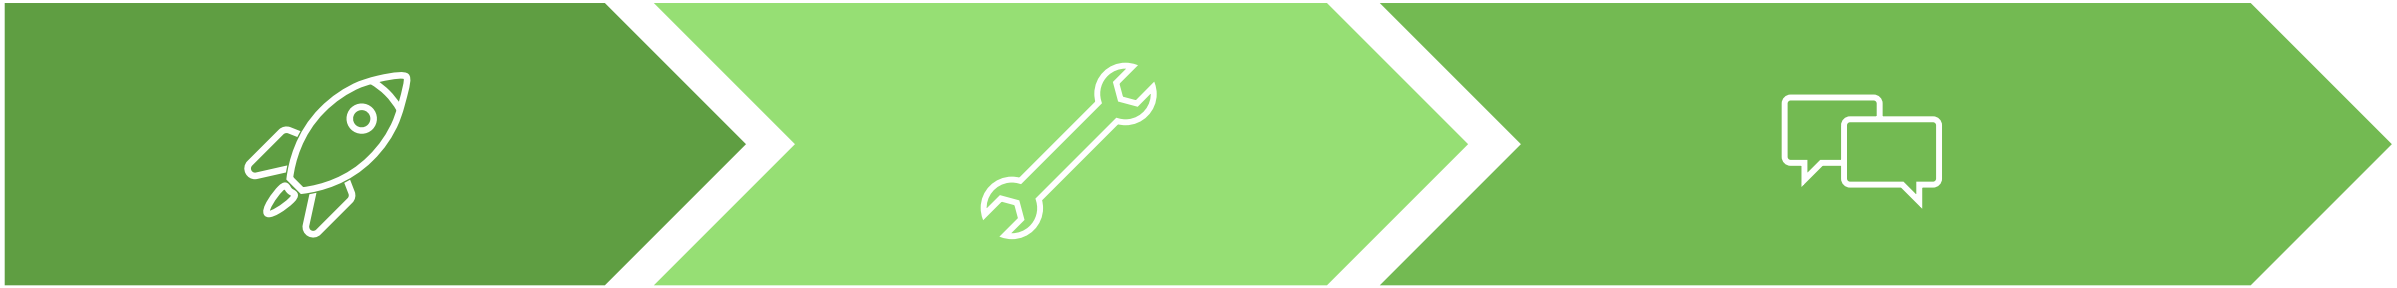
Risks & Mitigation

Reduce errors, confusion, and downtime

Moving Forward

Make Necessary Changes

Use insights to prepare a polished product



Launch Pilot Plan

3-month test period, collect data + insights

Full Scale Rollout

Official website launch of finished bot

Thank You!
